I. Introduction

All OECD and G20 countries have committed to implementing country by country (CbC) reporting, as set out in the Action 13 Report “Transfer Pricing Documentation and Country-by-Country Reporting”. Recognising the significant benefits that CbC reporting can offer a tax administration in undertaking high level risk assessment of transfer pricing and other BEPS related tax risks, a number of other jurisdictions have also committed to implementing CbC reporting (which with OECD members form the “Inclusive Framework”), including developing countries.

Jurisdictions have agreed that implementing CbC reporting is a key priority in addressing BEPS risks, and the Action 13 Report recommended that reporting take place with respect to fiscal periods commencing from 1 January 2016. Swift progress is being made in order to meet this timeline, including the introduction of domestic legal frameworks and the entry into competent authority agreements for the international exchange of CbC reports. MNE Groups are likewise making preparations for CbC reporting, and dialogue between governments and business is a critical aspect of ensuring that CbC reporting is implemented consistently across the globe. Consistent implementation will not only ensure a level playing field, but also provide certainty for taxpayers and improve the ability of tax administrations to use CbC reports in their risk assessment work.

The OECD will continue to support the consistent and swift implementation of CbC reporting. Where questions of interpretation have arisen and would be best addressed through common public guidance, the OECD will endeavour to make this available. The guidance in this document is intended to assist in this regard.

Some questions and answers refer to articles of the Model Legislation related to Country-by-Country Reporting contained in the Action 13 Report (“Model Legislation”). Such references do not mean that countries' domestic legislation should follow word-for-word the provisions in the Model Legislation. As indicated in paragraph 61 of the Action 13 Report “jurisdictions will be able to adapt this model legislation to their own legal systems, where changes to current legislation are required”. Countries' domestic legal framework should however, be substantively consistent with the Model Legislation.

II. Issues relating to the definition of items reported in the template for the CbC report

1. Definition of revenues (April 2017, September 2017)

1.1 Should extraordinary income and gain from investment activities be included in the column "Revenues" in the CbC report?

Extraordinary income and gains from investment activities are to be included in "Revenues."

1.2 When financial statements are used as the source of the data to complete the CbC template, which items shown in the financial statements should be reported as Revenues in Table 1? (cf. question 5 on fair value accounting).

All revenue, gains, income, or other inflows shown in the financial statement prepared in accordance with the applicable accounting rules relating to profit and loss, such as the income statement or profit and loss statement, should be reported as Revenues in Table 1. For example, if the income statement prepared in accordance with the applicable accounting rules shows sales revenue, net capital gains from sales of assets, unrealized gains, interest received, and extraordinary income, the amount of those items reported in the income statement should be aggregated and reported as Revenues in Table 1. Comprehensive income/earnings, revaluations, and/or unrealized gains reflected in net assets and the equity section of the balance sheet should not be reported as Revenues in Table 1. The amount of any income items shown on the income statement need not be adjusted from a net amount.

Inclusive Framework members are expected to implement the above guidance as soon as possible, taking into account their specific domestic circumstances. It is recognised that time may be needed for MNE Groups to take this guidance into account. Jurisdictions may thus allow some flexibility during a short transitional period.

2. Definition of related parties (April 2017)

2.1 Which entities are considered to be related parties for purposes of reporting related party revenues?

For the third column of Table 1 of the CbC report, the related parties, which are defined as “associated enterprises” in the Action 13 report, should be interpreted as the Constituent Entities listed in Table 2 of the CbC report.

3. Aggregated data or consolidated data to be reported per jurisdiction (July 2017)

3.1 If there is more than one constituent entity in a jurisdiction, should the aggregated data be reported or should the data that is reported for the jurisdiction consist of consolidated data which eliminates intra-jurisdiction transactions between constituent entities in that jurisdiction?

The Action 13 Report and the model legislation contemplate that reporting will occur on an aggregate basis at a jurisdictional level. Accordingly, data should be reported on an aggregated basis, regardless of whether the transactions occurred cross-border or within the jurisdiction, or between related parties or unrelated parties. This guidance will be particularly relevant for the columns on related party revenues and total revenues. An MNE Group may use the notes section in Table 3 to explain the data if it wishes to do so.

Where the jurisdiction of the Ultimate Parent Entity has a system of taxation for corporate groups which includes consolidated reporting for tax purposes, and the consolidation eliminates intra-group transactions at the level of individual line items, that jurisdiction may allow taxpayers an option to complete the CbC report using consolidated data at the jurisdictional level, as long as consolidated data are reported for each jurisdiction in Table 1 of the CbC report and consolidation is used consistently across the years. Taxpayers choosing this option should use the following wording in Table 3 that (or in local language): "This report uses consolidated data at the jurisdictional level for reporting the data in Table 1", and should specify the columns in Table 1 in which the consolidated data is different than if aggregated data were reported.

Inclusive Framework members are expected to implement the above guidance (reporting on an aggregated basis only, apart from the exception described above) as soon as possible, taking into account their specific domestic circumstances. It is recognised that time may be needed for MNE Groups to make the necessary adjustments, for example in situations where guidance permitting the reporting of consolidated data for intra-jurisdiction transactions has already been issued. Jurisdictions may thus allow some flexibility during a short transitional period (i.e. for fiscal years starting in 2016). Taxpayers reporting consolidated data under this transitional mechanism should provide the same information in Table 3 as described in the previous paragraph.

4. Amount of Income Tax Accrued and Income Tax Paid (September 2017)

4.1 Where the income tax for a fiscal year has been paid in advance (e.g., preliminary tax assessments based on an estimate of the year's corporate income tax), should the amount reported in the "Income Tax Accrued-Current Year" column be linked to the amount reported in the "Income Tax Paid (on Cash Basis)" column of Table 1?"

Income Tax Accrued-Current Year is the amount of accrued current tax expense recorded on taxable profits or losses for the Reporting Fiscal Year of all Constituent Entities resident for tax purposes in the relevant tax jurisdiction irrespective of whether or not the tax has been paid (e.g. based on a preliminary tax assessment).

Income Tax Paid (on Cash Basis) is the amount of the taxes actually paid during the Reporting Fiscal Year, which should thus include not only advanced payments fulfilling the relevant fiscal year's tax obligation but also payments fulfilling the previous year(s)' tax obligation (e.g. payment of the unpaid balance of corporate income tax accrued in relation to the previous year(s), including payments related to reassessments of previous years), regardless of whether those taxes have been paid under protest. The amount of Income Tax Accrued-Current Year and Income Tax Paid (on Cash Basis) should be reported independently.

4.2 Where taxes have been paid and subsequently refunded, how should the tax refund be reported for the purposes of Table 1?

In general, a refund of income tax should be reported in Income Tax Paid (on Cash Basis) in the reporting fiscal year in which the refund is received. An exception to this may be permitted where the refund is treated as revenue of the MNE group under the applicable accounting standard or in the source of data used to complete Table 1. Where this is the case, taxpayers should provide the following statement in Table 3: "Tax refunds are reported in Revenues and not in Income Tax Paid (on Cash Basis)".

Inclusive Framework members are expected to implement the above guidance as soon as possible, taking into account the specific domestic circumstances. It is recognised that time may be needed for jurisdictions and MNE Groups to take this guidance into account. Jurisdictions may thus allow some flexibility during a short transitional period. During this short transitional period, taxpayers are encouraged to include voluntarily, if relevant, the statement "Tax refunds are reported in Revenues and not in Income Tax Paid (on Cash Basis)" in Table 3.

5. Fair value accounting (November 2017) (NEW) (cf. question 1 on definition of revenues)

5.1 When financial statements that were prepared using fair value accounting are used as the source of data, can the amounts reported as revenue and profits in those financial statements be reported as Revenue and Profits in the CbC report without further adjustments?

Yes. The amount of revenues and profits determined in accordance with fair value accounting and reported in financial statements may be reported in the CbC report without further adjustment.

6. Negative figure for accumulated earnings (November 2017) (NEW)

6.1 If a constituent entity reports a negative figure for accumulated earnings in its financial statements, should the negative figure be reported in the column "accumulated earnings" in Table 1? If there are two or more constituent entities in a jurisdiction, should the negative figure reported by a constituent entity be netted with the earnings from the other constituent entity (entities) per jurisdiction in Table 1?

The negative figure for accumulated earnings should be reported in Table 1 without modification. Where there are two or more constituent entities in the same jurisdiction, the negative figures for accumulated earnings, if there are any, should be netted with the positive figures for accumulated earnings. Where this is the case, taxpayers should provide the following statement in Table 3: "Accumulated earnings include negative figures for jurisdiction [--]". Inclusive Framework members are encouraged to require their taxpayers to provide the above information in Table 3 as soon as possible, taking into account the specific domestic circumstances.

III. Issues relating to the entities to be reported in the CbC report

1. Application of CbC reporting to investment funds (June 2016)

1.1 How should the CbC reporting rules be applied to investment funds?

As stated in paragraph 55 of the Action 13 Report, there is no general exemption for investment funds. Therefore the governing principle to determine an MNE Group is to follow the accounting consolidation rules. For example, if the accounting rules instruct investment entities to not consolidate with investee companies (e.g. because the consolidated accounts for the investment entity should instead report fair value of the investment through profit and loss), then the investee companies should not form part of a Group or MNE Group (as defined in the model legislation) or be considered as Constituent Entities of an MNE Group. This principle applies even where the investment entity has a controlling interest in the investee company.

On the other hand, if the accounting rules require an investment entity to consolidate with a subsidiary, such as where that subsidiary provides services that relate to the investment entity's investment activities, then the subsidiary should be part of a Group and should be considered as a Constituent Entity of the MNE Group (if one exists).

It is still possible for a company, which is owned by an investment fund, to control other entities such that, in combination with these other entities, it forms an MNE Group. In this case, and if the MNE Group exceeds the revenue threshold, it would need to comply with the requirement to file a CbC report.

2. Application of CbC reporting to partnerships (June 2016)

2.1 How should a partnership which is tax transparent and thus has no tax residency anywhere be included in the CbC report? How should a reverse hybrid partnership, which is tax transparent in its jurisdiction of organisation but considered by a partner's jurisdiction to be tax resident in its jurisdiction of organisation, be treated?

The governing principle to determine an MNE Group is to follow the accounting consolidation rules. If the accounting consolidation rules apply to a partnership, then that partnership may be a Constituent Entity of an MNE group subject to CbC reporting.

For the purpose of completing the CbC report, if a partnership is not tax resident in any jurisdiction then the partnership's items, to the extent not attributable to a permanent establishment, should be included in the line in table 1 of the CbC report for stateless entities. Any partners that are also Constituent Entities within the MNE Group should include their share of the partnership's items in table 1 in their jurisdiction of tax residence.

Table 2 of the CbC report should include a row for stateless entities and a sub-row for each stateless entity including partnerships that do not have a tax residence - that is, the reporting for stateless entities should parallel the reporting for Constituent Entities that have a tax residence. For a partnership included in the stateless entity category, the field in table 2 for "tax jurisdiction of organisation or incorporation if different from tax jurisdiction of residence" should indicate the jurisdiction under whose laws the partnership is formed / organised.

It may be advisable for the MNE to provide an explanation in the notes section of the report on the partnership structure and on the stateless entities. For instance, a note in the Additional Information section may indicate that a partnership's "stateless income" is includable and taxable in the partner jurisdiction.

Where a partnership is the Ultimate Parent Entity, for the purpose of determining where it is required to file the CbC report in its capacity as the Ultimate Parent Entity, the jurisdiction under whose laws the partnership is formed / organised will govern if there is no jurisdiction of tax residence.

A permanent establishment of a partnership would be included in the CbC report in the same manner as any other permanent establishment.

3. Accounting principles/standards for determining the existence of and membership of a group (April 2017)

3.1 To determine the existence of a “Group” and the membership of the Group under Article 1.1 of the model legislation in the Action 13 report:

- a) *If the equity interests of the relevant enterprise* are traded on a public securities exchange, should the applicable accounting standards be the accounting standards that currently apply to that enterprise for consolidated financial statement purposes?*
- b) *If the equity interests of the relevant enterprise* are not traded on a public securities exchange, can the applicable accounting standards be chosen provided that the choice is either (i) local GAAP in the jurisdiction of the enterprise assumed to be listed or (ii) International Financial Reporting Standards (IFRS), and provided the method chosen is used consistently?*

***Relevant enterprise would be the Ultimate Parent Entity under Article 1.6 of the model legislation in the Action 13 report.**

The Action 13 report does not specify that any particular accounting standard's consolidation rules be used. It is expected that:

- a) If the equity interests of the relevant enterprise, which would be an Ultimate Parent Entity under Article 1.6 of the model legislation, are traded on a public securities exchange, jurisdictions will require the Group to use the consolidation rules in the accounting standards already used by the Group.
- b) If the equity interests of the relevant enterprise, which would be an Ultimate Parent Entity under Article 1.6 of the model legislation, are not traded on a public securities exchange, jurisdictions may allow the Group to choose to use either local GAAP of the jurisdiction of the Ultimate Parent Entity (which includes US GAAP if it is permitted under the local rules and regulations of the jurisdiction of the Ultimate Parent Entity) or IFRS as its governing accounting standard, as long as the Group applies this choice consistently across years and for other aspects of the CbC report requiring reference to an accounting standard. However, if the jurisdiction of residence of the enterprise that would be the Ultimate Parent Entity mandates the use of a particular accounting standard (or standards) for enterprises the equity of which is traded on a public securities exchange, this mandatory standard (or one of these mandatory standards) must be used. Exceptionally, if a jurisdiction's consolidation rules generally require investment entities to be consolidated with investee companies, the jurisdiction may mandate the use of IFRS consolidation rules for the purpose of determining the membership of a Group. Any such deviation from the accounting standards generally followed for the CbC report of a particular MNE Group should be noted in Table 3 of the CbC report for the MNE Group.

This guidance relates to what a jurisdiction may require from a Group which is a Group that is required to file a CbC report in the jurisdiction by reason of its Ultimate Parent Entity or Surrogate Parent Entity being resident in the jurisdiction.

4. Treatment of major shareholdings (April 2017)

4.1 Where there are minority interests held by unrelated parties in a Constituent Entity, should the previous year's consolidated group revenue include 100 percent of the Constituent Entity's revenue for the purpose of applying the 750 million Euro threshold (or near equivalent amount in local currency as of January 2015) to identify an Excluded MNE Group, or should the revenue be pro-rated? Further, should the entity's financial data that is included in the CbC report represent the full 100 percent or should it be pro-rated?

Under the condition that accounting rules in the jurisdiction of the Ultimate Parent Entity require a Constituent Entity, the minority interests of which are held by unrelated parties, to be fully consolidated, 100 percent of the entity's revenue should be included for the purpose of applying the 750 million Euro threshold (or near equivalent amount in local currency as of January 2015). In such a case, the entity's financial data that is included in the CbC report should represent the full 100 percent amount and should not be pro-rated. In contrast, if the accounting rules require proportionate consolidation in the presence of minority interests, then the jurisdiction may allow the entity's revenue to be pro-rated for the purpose of applying the 750 million Euro threshold and may also allow its financial data that is included in the CbC report to be pro-rated.

5. Treatment of an entity owned and/or operated by more than one unrelated MNE Groups (July 2017)

5.1 Where an entity owned and/or operated by more than one unrelated MNE Groups (e.g. a joint venture entity) is consolidated in the consolidated financial statements of one or more of these MNE Groups, including under a pro rata consolidation rule, is such an entity considered a Constituent Entity of those unrelated MNE Groups (i.e. should it be included in Table 2)? If so, where a pro rata consolidation rule is applied to the entity under the applicable accounting rules, should Table 1 include the pro rata data of the entity, and should the entity's revenue be included pro rata for the purpose of applying the 750 million Euro threshold?

The treatment of an entity for CbC reporting purposes should follow the accounting treatment. In the case of an entity which is owned and/or operated by more than one unrelated MNE Groups, the treatment of the entity for CbC reporting purposes should be determined under the accounting rules applicable to each of the unrelated MNE Groups separately. If the applicable accounting rules require an entity to be consolidated into the consolidated financial statements of an MNE Group, the entity would be considered as a Constituent Entity of that group under Article 1.4 of the Model Legislation. Accordingly, the financial data of such an entity should be reported in the CbC report of the MNE Group. This applies to entities included in the MNE Group's consolidated financial statements using either full consolidation or pro rata consolidation. If an entity is not required to be consolidated under applicable accounting rules, the entity would not be considered a Constituent Entity and, accordingly, the financial data of such an entity would not be reported in the CbC Report. Therefore an entity included in the MNE Group's consolidated financial statements under equity accounting rules would not be a constituent entity.

Where pro rata consolidation is applied to an entity in an MNE Group in preparing the group's consolidated financial statements, jurisdictions may allow a pro rata share of the entity's total revenue to be taken into account for the purpose of applying the 750 million Euro threshold, instead of the full amount of the entity's total revenue. Jurisdictions may also allow an MNE group to include a pro rata share of the entity's financial data in its CbC report, in line with the information included in the MNE Group's consolidated financial statements, instead of the full amount of this financial data.

6. Deemed listing provision (November 2017) (NEW)

6.1 What is the purpose of the deemed listing provision in the definition of the term "Group" in Article 1.1 of the Model Legislation?

The deemed listing provision in the definition of the term "Group" in Article 1.1 of the Model Legislation is only relevant where an enterprise would otherwise be the Ultimate Parent Entity (UPE), but it is not required to prepare Consolidated Financial Statements in the jurisdiction where it is a resident for tax purposes. In this case, the Group includes all entities that would be included in the Consolidated Financial Statements that the relevant enterprise would be required to prepare if it was listed on a public securities exchange. In applying the deemed listing provision, it is irrelevant whether or not a particular type of entity is in fact able to be listed, taking into account, among other things, the jurisdiction's company law and/or regulations governing the relevant public securities exchange.

For instance, some jurisdictions differentiate between public entities and non-public entities (or private entities) in determining whether Consolidated Financial Statements are required to be prepared (e.g. the United States and Canada). In this case, the deemed listing provision would be relevant in determining the constituent entities in an MNE Group where the UPE is a non-public entity. The term "public entities" refers to entities which have instruments listed on a public securities exchange and the expression "non-public entities" refers to entities which have no instruments traded on a public securities exchange. The term "public entity" does not refer to an entity held by public sector bodies.

In accordance with paragraph 55 of the Action 13 Report, neither the deemed listing provision nor this guidance should be interpreted as giving rise to any exemption from the obligation to file the Country-by-Country report other than as set out in paragraph 52 of the Action 13 Report and Article 1.3 of the Model Legislation.

IV. Issues relating to the filing obligation for the CbC report

1. Impact of currency fluctuations on the agreed EUR 750 million filing threshold (June 2016)

1.1 If Country A is using a domestic currency equivalent of EUR 750 million for its filing threshold, Country B is using EUR 750 million for its filing threshold, and as a result of currency fluctuations Country A's threshold is in excess of EUR 750 million, can Country B impose its local filing requirement on a Constituent Entity of an MNE Group headquartered in Country A which is not filing a CbC report in Country A because its revenues, while in excess of EUR 750 million, are below the threshold in Country A?

As set out in the Action 13 Report, the agreed threshold is EUR 750 million or a near equivalent amount in domestic currency as of January 2015. Provided that the jurisdiction of the Ultimate Parent Entity has implemented a reporting threshold that is a near equivalent of EUR 750 million in domestic currency as it was at January 2015, an MNE Group that complies with this local threshold should not be exposed to local filing in any other jurisdiction that is using a threshold denominated in a different currency.

There is no requirement for a jurisdiction using a threshold denominated other than in euros to periodically revise this in order to reflect currency fluctuations. The appropriateness of the EUR 750 million threshold (and near equivalent amounts in domestic currency as of January 2015) may be included in the review of the CbC reporting minimum standard to occur in 2020.

2. Definition of total consolidated group revenue (April 2017; updated November 2017) (UPDATED)

2.1 For the purpose of determining whether an MNE Group is an Excluded MNE Group, are extraordinary income and gains from investment activities included in total consolidated group revenue?

In determining whether the total consolidated group revenue of an MNE Group is less than 750 million Euro (or near equivalent amount in local currency as of January 2015), all of the revenue that is (or would be) reflected in the consolidated financial statements should be used. A jurisdiction where the Ultimate Parent Entity resides is allowed to require inclusion of extraordinary income and gains from investment activities in total consolidated group revenue if those items are presented in the consolidated financial statements under applicable accounting rules.

For financial entities, which may not record gross amounts from transactions in their financial statements with respect to certain items, the item(s) considered similar to revenue under the applicable accounting rules should be used in the context of financial activities. Those items could be labelled as ‘net banking product’, ‘net revenues’ or others depending on accounting rules. For example, if the income or gain from a financial transaction, such as an interest rate swap, is appropriately reported on a net basis under applicable accounting rules, the term ‘revenue’ means the net amount from the transaction.

An MNE Group that complies with the rules of the jurisdiction of the Ultimate Parent Entity or the Surrogate Parent Entity on the calculation of consolidated group revenue for purposes of determining its CbC filing obligations, should not be exposed to local filing in any other jurisdiction provided the rules of the jurisdiction where the Ultimate Parent Entity/Surrogate Parent Entity is resident for tax purposes are consistent with the Action 13 minimum standard, as supplemented by the implementation guidance.

3. Short accounting period (September 2017, November 2017) (NEW)

3.1 Is transitional relief available for MNE Groups with a short accounting period that starts on or after 1 January 2016 and that ends before 31 December 2016?

As a transitional measure, jurisdictions may allow the Reporting Entity of an MNE Group with a short accounting period beginning on or after 1 January 2016 and ending before 31 December 2016 to file the required CbC report in accordance with the same timelines as for MNE Groups with a fiscal year ending on 31 December 2016. The date by which the CbC report is to be exchanged would be similarly extended. This transitional relief would not frustrate the policy intention of the Action 13 minimum standard.

3.2 When the preceding fiscal year of an Ultimate Parent Entity was shorter than 12 months, how should it be determined whether the Group is or is not an Excluded MNE Group? (NEW)

For purposes of applying the 750 million Euro threshold in Article 1.3 of the Model Legislation when the preceding fiscal year of an Ultimate Parent Entity (UPE) is shorter than 12 months, the jurisdiction of the Ultimate Parent Entity may choose to adopt one of a number of different approaches, including the following:

1. Use the actual total consolidated group revenue obtained by the Group for the short accounting period;
2. Adjust the total consolidated group revenue for the short accounting period to reflect the consolidated group revenue that would correspond to a 12 month accounting period; or
3. Calculate the pro rata share of the 750 million Euro threshold that would correspond to the short accounting period.

This flexibility given to jurisdictions may lead to cases where divergent views are reached on whether the Group meets the 750 million Euro threshold in Article 1.3 of the Model Legislation. This may happen when the jurisdiction where the UPE is a resident for tax purposes adopts the approach described in option 1, while one or more jurisdictions where the Constituents Entities are resident for tax purposes adopt the approaches described in options 2 or 3. In those cases, when the jurisdiction where the UPE or Surrogate Parent Entity (SPE) is resident for tax purposes applies option 1, the jurisdiction of UPE or SPE's residence is encouraged (but not required) to allow the UPE or SPE to file a CbC report on a voluntary basis (as there is no legal obligation to do so) and exchange it under exchange of information mechanisms in order to avoid one or more constituent entities being subject to local filing in those jurisdictions that apply options 2 or 3 and where constituent entities of the MNE Group are resident for tax purposes.

V. Issues relating to the sharing mechanism for the CbC report (EOI, surrogate filing and local filing)

1. Transitional filing options for MNEs (“parent surrogate filing”) (June 2016; updated July 2017¹)

1.1 Can MNE Groups with an Ultimate Parent Entity resident in a jurisdiction whose CbC reporting legal framework is in effect for Reporting Periods later than 1 January 2016 voluntarily file the CbC report for fiscal periods commencing on or from 1 January 2016 in that jurisdiction? What is the impact of such filing on local filing obligations in other jurisdictions?

All OECD and G20 countries, as well as others, have committed to implementing the minimum standard of Country by Country (CbC) reporting agreed in the Action 13 Report. The Action 13 Report recommended that countries implement a legal requirement for CbC reporting with respect to MNEs’ fiscal periods commencing on or from 1 January 2016. At the same time, the Action 13 Report recognises that “some jurisdictions may need time to follow their particular domestic legislative process in order to make necessary adjustments to the law.” Where jurisdictions are implementing CbC Reporting but will not be able to implement with respect to the fiscal period commencing from 1 January 2016, this therefore gives rise to a transition issue. Where other jurisdictions introduce a local filing obligation (which is an option but not a requirement under the Action 13 minimum standard) and do not otherwise provide any transition relief to address this issue - which some countries have done recognising the differences in legislative processes as noted in the Report - there is a need to issue guidance as to the local filing obligations that may arise during such a period.

In such situations, jurisdictions that will not be able to implement with respect to fiscal periods from 1 January 2016 may be able to accommodate voluntary filing for Ultimate Parent Entities resident in their jurisdiction. This would allow the Ultimate Parent Entities of an MNE Group resident in those jurisdictions to voluntarily file their CbC report for the fiscal periods commencing on or from 1 January 2016 in their jurisdiction of tax residence. This is referred to as “parent surrogate filing” because it is a form of surrogate filing, the framework for which is set out in the Action 13 Report. As such, parent surrogate filing does not alter the timelines or the minimum standard, and thus ensures the integrity of the agreement reached in the Action 13 Report.

Where surrogate filing (including parent surrogate filing) is available, it will mean that there are no local filing obligations for the particular MNE in any jurisdiction which otherwise would require local filing in which the MNE has a Constituent Entity (herein referred to as the Local Jurisdiction). This is subject to the following conditions:

1. the Ultimate Parent Entity has made available a CbC report conforming to the requirements of the Action 13 Report to the tax authority of its jurisdiction of tax residence, by the filing deadline (i.e. 12 months after the last day of the Reporting Fiscal Year of the MNE Group); and
2. by the first filing deadline of the CbC report, the jurisdiction of tax residence of the Ultimate Parent Entity must have its laws in place to require CbC reporting (even if filing of a CbC report for the Reporting Fiscal Year in question is not required under those laws); and

1. The list of jurisdictions at the end of this guidance is dynamic and is updated periodically.

3. by the first filing deadline of the CbC report, a Qualifying Competent Authority Agreement must be in effect between the jurisdiction of tax residence of the Ultimate Parent Entity and the Local Jurisdiction;² and
4. the jurisdiction of tax residence of the Ultimate Parent Entity has not notified the Local Jurisdiction's tax administration of a Systemic Failure; and
5. the following notifications have been provided:³
 - the jurisdiction of tax residence of the Ultimate Parent Entity has been notified by the Ultimate Parent Entity, no later than [the last day of the Reporting Fiscal Year of such MNE Group]; and
 - the Local Jurisdiction's tax administration has been notified by a Constituent Entity of the MNE Group that is resident for tax purposes in the Local Jurisdiction that it is not the Ultimate Parent Entity nor the Surrogate Parent Entity, stating the identity and tax residence of the Reporting Entity, no later than [the last day of the Reporting Fiscal Year of such MNE Group].

The jurisdictions which have confirmed they will have parent surrogate filing available consistent with the framework outlined above for Ultimate Parent Entities that are resident in their jurisdiction, with respect to fiscal periods commencing on or from 1 January 2016, are listed here: www.oecd.org/tax/automatic-exchange/country-specific-information-on-country-by-country-reporting-implementation.htm

-
2. A necessary condition for having a Qualifying Competent Authority Agreement in effect is that there is also an International Agreement in effect between the jurisdiction of tax residence of the Ultimate Parent Entity and the Local Jurisdiction.
 3. If the tax administration in the jurisdiction where the Ultimate Parent Entity or Constituent Entity (as applicable) is resident for tax purposes chooses not to require notifications or has not specified a procedure for providing such notifications, then this condition will not be relevant. Furthermore, where such notification is required, the square brackets included in this section reflect that it is at the discretion of the jurisdiction to choose the notification date most appropriate in its domestic circumstances, for example the date that would coincide with the date for filing of a CbC Report.

2. CbC reporting notification requirements for MNE Groups during transitional phase (December 2016)

2.1 Article 3 of the Action 13 model legislation for CbC reporting includes an option for jurisdictions to require notifications to be sent to the country tax administration identifying the Reporting Entity for the MNE Group. Where a Constituent Entity of an MNE Group is required to notify its tax administration of the identity and tax residence of the Reporting Entity (including the Surrogate Parent Entity) of the MNE Group by 31 December 2016 (with respect to the 2016 fiscal year), would it be consistent with the Action 13 minimum standard for jurisdictions to provide some transitional relief during the period in which domestic CbC legal frameworks and Qualifying Competent Authority Agreements are still being put in place?

A practical issue may arise for a number of MNE Groups around the world which are currently in the process of identifying the reporting entity and considering whether to proceed with surrogate filing where local filing obligations would otherwise be applicable. This issue relates to the domestic notification requirements that Constituent Entities of MNE Groups may be subject to, requiring them to inform their tax administration about the identity of the Reporting Entity that will be filing the CbC report. In a number of cases these notifications will need to be submitted by 31 December 2016 with respect to the 2016 fiscal year.

However, the identity of the appropriate reporting entity may not be known by that time. This is because the identity of the reporting entity will depend on the domestic CbC legal frameworks and the international exchange of information relationships that are formed through Qualifying Competent Authority Agreements (QCAAs). Domestic legal frameworks are still being finalised, and Qualifying Competent Authority Agreements may not be in place by 31 December 2016.

MNE Groups that are seeking to comply with their legal obligations to provide notifications, where such obligations exist, therefore face a practical difficulty in doing so because necessary information will not be available. To address this issue, jurisdictions may provide some flexibility regarding the date for the notification requirement if applicable, as neither the Action 13 standard nor the model legislation requires the notification to be at the end of the reporting fiscal year. For example, jurisdictions which are introducing notification requirements may choose another date for notifications, such as the date for filing a CbC report or the date for filing a corporate tax return.

Jurisdictions which require notifications may also provide administrative guidance to allow transitional relief in respect of these requirements. For example, Constituent Entities could be authorised to provide a notification based on a preliminary assessment of the identity and tax residence of the Reporting Entity. An updated notification based on new information could be provided by the Constituent Entity by the date for filing the CbC report. Jurisdictions which require notifications could also provide transitional relief from penalties in connection with MNE Groups updating their notification.

Transitional relief in these circumstances would not be frustrating the policy intention of the Action 13 minimum standard.

In addition, to provide clarity as soon as possible to MNE Groups, jurisdictions will work towards bringing their Qualifying Competent Authority Agreements (QCAA) into effect as soon as possible so as to minimize this transitional issue.

VI. Issues relating to Mergers/Acquisitions/Demergers (NEW)

1. Treatment in case of Mergers/Acquisitions/Demergers (NEW)

1.1 When in a given year there are changes in ownership due to mergers, acquisitions and demergers, how is the CbC filing obligation for that given year affected and what information should be reported in the CbC report?

For the year in which a merger/acquisition/demerger occurs, the determination of whether the Group is or is not an Excluded MNE Group shall be based on the Group's total consolidated group revenue during the Fiscal Year immediately preceding the Reporting Fiscal Year, as reflected in its Consolidated Financial Statements for such preceding Fiscal Year. There is no need to adjust the consolidated group revenue for the preceding Fiscal Year due to a merger/acquisition/demerger occurring during the following year.

As to the information to be reported in the CbC report for the year in which the merger/acquisition/demerger occurs, the accounting principles/standards (as determined in accordance with the guidance to identify the accounting principles/standards for determining the existence and membership of a group) will govern the determination as to the period for which the financial data of the merged/acquired/demerged constituent entities should be included in CbC reports of the relevant MNE Groups (e.g. a pro rata share or full year). In accordance with the flexibility given on the source of data for purposes of completing Table 1, the information reported in Table 1 may be taken from a source using different accounting principles/standards from those applied in the Consolidated Financial Statements.

There may be cases where a group (Acquired Group) is acquired by another group (Succeeding Group) on a date other than the Acquired Group's regular fiscal year end. For example, Acquired Group could prepare its regular financial statements on a calendar year basis, but be acquired by Succeeding Group on 30 June Y1. Assuming the Acquired Group had total consolidated group revenues in Y0 which were not less than 750 million EUR, whether the Acquired Group will be obligated to submit a CbC report for the period from 1 January Y1 to 30 June Y1 will depend upon whether it is required to prepare Consolidated Financial Statements for this period in the jurisdiction where its Ultimate Parent Entity is tax resident (or if the deemed listing provision applies). If there is no such requirement, then the Acquired Group will not be obligated to submit a CbC report for this period. In such a case, the Succeeding Group should in Table 3 of its CbC Report for Y1: a) indicate that the Succeeding Group acquired the Acquired Group and the date of acquisition; and, b) include the following statement: "The Acquired Group did not file a CbC report in any jurisdiction for the period 1 January Y1 to 30 June Y1". Inclusive Framework members are encouraged to require their taxpayers to provide the above information in Table 3 as soon as possible, taking into account the specific domestic circumstances.

The following fact patterns illustrate the application of this guidance.

Fact Pattern #1

In Y1, Group S sells a sub-group of its own entities. The sub-group of entities subsequently becomes an independent Group, Group E.

1.2 How should Group S and Group E determine if they qualify as Excluded MNE Group(s) for Y1?

In order to determine whether a Group is an Excluded MNE Group under Article 1.3 of the Model Legislation, there is no need to adjust the consolidated group revenue for the preceding Fiscal Year due to a merger/acquisition/demerger occurring during the following year. Group S should be required to file a CbC report for Y1 if the total consolidated group revenue of Group S for Y0 was equal to or greater than 750 million euros (or near equivalent amount in local currency as of January 2015).

In the case of Group E, the Action 13 minimum standard does not contain specific guidance on how to treat a group that was part of another MNE group in the previous fiscal year. Jurisdictions may take the view that, as Group E did not exist legally as an independent Group in Y0, Group E is not required to file a CbC report for Y1. Some other jurisdictions may consider that the sub-group of entities (which upon sale become an independent Group E) already existed from an economic point of view before the sale, as part of Group S and should, therefore, be required to file the CbC report for Y1 if the total consolidated revenues for the sub-group of entities in Y0 is equal to or greater than 750 million Euro. Where Group E complies with the approach adopted by the jurisdiction of its UPE on this specific aspect, the constituent entities of Group E should not be exposed to local filing in any other jurisdiction.

1.3 In a case where Group S is not an Excluded MNE in Y1 based on its total consolidated group revenue for Y0, should Group S include only a pro rata share of the sub-group's financial data in its CbC report for Y1?

The determination as to the period for which the financial data of the sub-group should be included in the CbC reports of Group S (e.g. pro rata share or full year) should be governed by the accounting principles/standards applicable to Group S (as determined in accordance with the guidance to identify the accounting principles/standards for determining the existence and membership of a group). Thus, if the accounting principles/standards applicable to Group S require its Consolidated Financial Statements to incorporate a pro rata share of the financial data of the sub-group (i.e. Group E subsequently), Group S's CbC report should also include a pro rata share of the financial data of the sub-group (Group E).

Fact Pattern #2

In Y1, Group B acquires 100% of Group E. Both Group B and Group E qualify as an Excluded MNE Group for purposes of Y1 as the total consolidated group revenue of each during the preceding Fiscal Year (Y0) is less than 750 million Euros.

1.4 If the combined total consolidated group revenues of Group B and Group E during Y0 are equal to or greater than 750 million Euros, does this change the position of Group B as an Excluded MNE Group for purposes of its CbC report filing obligation for Y1?

No, Group B will continue to be an Excluded MNE Group for Y1 purposes. For the year in which a merger/acquisition/demerger occurs, i.e. Y1, the determination of whether the Group is or not an Excluded MNE Group shall be based on the Group's total consolidated group revenue during the Fiscal Year immediately preceding (i.e. Y0) the Reporting Fiscal Year as reflected in its Consolidated Financial Statements for such preceding Fiscal Year. There is no need to adjust the consolidated group revenue for the preceding Fiscal Year due to a merger/acquisition/demerger occurring during the following year.

Fact Pattern #3

On 30 June of Y1, Group B acquires 100% of Group E. Neither Group B nor Group E qualify as an Excluded MNE Group for purposes of Y1, as the total consolidated group revenue of each during the preceding Fiscal Year (Y0) is equal to or greater than 750 million Euros.

1.5 Should Group E file a CbC report for the period from 1 January Y1 to 30 June Y1?

The determination as to whether Group E should file a CbC report for the period from 1 January Y1 to 30 June Y1 will depend on whether Group E is required to prepare Consolidated Financial Statements. If Group E is obligated to prepare Consolidated Financial Statements for the period from 1 January Y1 to 30 June Y1 (or if the deemed listing provision applies) under the financial reporting rules in the jurisdiction of the UPE's residence, Group E should also prepare and file a CbC report for the short fiscal period before the acquisition.*

However, where the UPE of Group E is not obligated to prepare the Consolidated Financial Statements for the period from 1 January Y1 to 30 June Y1 under financial reporting rules in the jurisdiction where the UPE is a tax resident, Group E is not obligated to prepare and file a CbC report for the short fiscal period either. In these circumstances, Group B should in Table 3 of its CbC Report a) indicate that Group B acquired Group E; and, b) include the following statement: "Group E did not file a CbC report with any jurisdictions for the short accounting period before the acquisition." Inclusive Framework members are encouraged to require taxpayers to provide the above information in Table 3 as soon as possible, taking into account the specific domestic circumstances.

*In case where the UPE of Group E does not exist after the acquisition, the entity or person (e.g. a lawyer or agent) responsible under the applicable rules (e.g. accounting, regulatory, or any other relevant legal provisions) to file the Consolidated Financial Statements for the short fiscal period is also expected to file the CbC report for Group E.

1.6 Should Group B report all or a pro rata share of Group E's financial data?

The determination as to the period for which the financial data of Group E should be included in the CbC report of Group B (e.g. pro rata share or full year) should be governed by the accounting principles/standards (as determined in accordance with the guidance to identify the accounting principles/standards for determining the existence and membership of a group) applied to Group B. Thus, if the accounting principles/standards applicable to Group B require Group B's Consolidated Financial Statements to incorporate a pro rata share of the financial data of Group E, the CbC report of Group B should also include a pro rata share of the financial data of the Group E.

Fact Pattern #4

In Y1, Group S sells a sub-group of its entities to Group B. The total consolidated group revenue of Group B for Y0 is less than EUR 750 million i.e. Group B is an Excluded MNE Group.

1.7 Should the amount of total consolidated group revenues in Y0 of Group S be adjusted due to its selling the sub-group?

The amount of total consolidated group revenue of the Fiscal Year immediately preceding the Reporting Fiscal Year (i.e. Y0) should not be adjusted to take into account the sale that occurred in Y1. If total consolidated group revenue in Y0 of Group S is equal to or greater than 750 million Euros, Group S would not qualify as an Excluded MNE Group for Y1. Alternatively, if total consolidated group revenue in Y0 is less than 750 million Euros, Group S remains an Excluded MNE Group for Y1.

1.8 To determine for Y1 whether it is an Excluded MNE Group under Article 1.3 of the Model Legislation, should Group B include in the amount of total consolidated group revenues for Y0 some or all of the revenues of the acquired sub-group of entities?

The amount of total consolidated group revenue of the Fiscal Year immediately preceding the Reporting Fiscal Year (i.e. Y0) should not be adjusted to take into account the acquisition that occurred in Y1. Group B should continue to qualify as an Excluded MNE Group based on the total consolidated group revenue of the Group for the preceding year.

Fact Pattern #5

In Y1, Group S sells a sub-group of entities to Group B. The total consolidated group revenue of each of Group B and Group S for Y0 is not less than EUR 750 million i.e. for Y1 purposes they are both non-Excluded MNE Groups

1.9 For Y1, should Group S's CbC report include any financial data of the sub-group of entities sold to Group B in Y1?

The determination as to whether any financial data of the sub-group of entities sold to Group B in Y1 should be included in the CbC report of Group S for Y1 should be governed by the accounting principles/standards (as determined in accordance with the guidance to identify the accounting principles/standards for determining the existence and membership of a group) applicable to Group S. Thus, if the governing accounting principles/standards applied to Group S require Group S's Consolidated Financial Statements to incorporate a pro rata share of the financial data of the sub-group of entities sold to Group B, the CbC report of Group S should also include a pro rata share of the financial data of the sub-group.

1.10 For Y1, should Group B include only a pro rata share of the acquired sub-group's financial data in its CbC report?

The determination as to the period for which financial data of the sub-group should be included in the CbC report of Group B (e.g. a pro rata share or full year) should be governed by the accounting principles/standards (as determined in accordance with the guidance to identify the accounting principles/standards for determining the existence and membership of a group) applicable to Group B. Thus, if the governing accounting principles/standards applied to Group B require Group B's Consolidated Financial Statements to incorporate a pro rata share of the financial data of the sub-group, the CbC report of Group B should also include a pro rata share of the financial data of the sub-group.
