Tax incentive policy recommendations

World Investment Report UNCTAD (2014)

Rationale should derive from country's development strategy and effectiveness should be fully assessed before adoption

Aim to ensure self-sustained viability so as to avoid subsidizing non-viable industries

Granted on the basis of pre-determined, objective, clear and transparent criteria, offered on a non-discriminatory basis

Transformation from "location-based" incentives towards "sustainable development goals-based" incentives

Source: UNICTAD World Investment Report 2014

SEA Investment Policy Perspectives *OECD (2014)*

Make public all tax incentives and their objectives and administer incentives in a transparent manner

Provide tax incentives through tax laws and ensure tax incentives are ratified through law-making body or parliament

Consolidate all incentives under the authority of one body, where possible

Calculate forgone revenue and make it publicly available, collect data systematically, monitor effects

Enhance regional co-operation

World Bank's "Assessing the Effectiveness and Impact of Fiscal Incentives in Malaysia" report

- Tax and incentive structure is overly generous and complex, and may leave room for tax abuse
- ! Tax holidays are ineffective
- I Overly generous R&D incentive schemes have not substantially raised R&D spending in the private sector
- ! R&D is quite sensitive to tax subsidies, but this does not mean that these subsidies are economically efficient
- ! Tax incentives may be very costly to the economy
- 1 Fiscal incentives schemes benefit mainly large firms
- Reinvestment allowance has a positive impact on large firms' investment
- Pressuring the tax system to compensate for deficiencies in the investment climate may have a large opportunity cost

What needs to be done?

- ☐ Scaling back tax incentives in favor of a more general decline in corporate income taxes will enhance efficiency
- ☐ Sequencing the reform of the tax incentives system
- ☐ Improving the overall investment climate by reducing the regulatory burden

The road ahead

- **?** By how much should the government reduce corporate income tax
- **?** What will be the cost of reducing corporate income tax, in terms of revenues
- **?** What should be the balance between incentives and corporate taxation

Recommendation:

- ► An appropriate costing of all corporate tax schemes
- ▶ More work on the revenue implications of reform proposals
- ► Broader examination of how business incentives fit into the tax system as a whole

2014 Tax Revision Bill of South Korea: tax packages to boost household income

Businesses that increase employees' wages will receive a 10% tax credit (5% for large corporations) on the increased portion*

* Wage growth exceeding average growth for the past 3 years

Lower WHT rate on dividend income earned on listed stocks* (from 14% to 9%) and allow financial income, which had been taxed at the general rate, to be taxed separately (at 25%)

*Listed stocks whose dividend payouts are both more than 120% of the market average of the dividend payout ratio + dividend yield and more than a 10% increase in total dividend payout

or

Listed stocks whose dividend payouts are both more than 50% of the market average of the dividend payout ratio + dividend yield and more than a 30% increase in total dividend payout

Businesses must spend a certain amount on investments, wage increases and dividend payments, or be subject to a 10% tax

- ► Applicable to businesses with an excess of 50 billion won in equity capital and large conglomerates where mutual shareholding between affiliates is banned
- ► Businesses will be able to choose between either the A or B method for this tax and must adhere to these methods for 3 years
 - A. [income x base rate α(60-80%) (investment + employee wage increase + dividends, and etc.*)]
 x 10% tax rate
 - B. [income x base rate $\beta(20-40\%)$ (employee wage increase + dividends, and etc.*)] x 10% tax rate

Tax incentive administrative issues

Issuer of approval letter

MOF vs. Investment Promotion Authorities

- ▶ Who should be the right issuer?
- ► Legally sufficient if the tax incentive is not directly "issued / approved" by MOF?

Wording of approval letter

Malay wording vs. English wording

- ▶ Inconsistency in terms of meaning of words when both languages are used (e.g. bi-language approval letter, initial and revised letter use different languages)
- ▶ Which language should prevail when there is inconsistency?

Procedural requirements

- ▶ Is there a need to comply with standard post-incentive procedural requirement (e.g. Pioneer Certificate, Determination of Effective Date) when the approval letter is silent about it?
- ▶ What is the tax incentive commencement date / how should it be determined?

Wording of approval letter

Number of posts approved

► Expatriate approval is currently granted on per-post basis. May want to consider granting the said approval on a "blanket" basis

Conditions of tax incentive

"The company shall comply with all rules and regulations of the Government of Malaysia"

- ▶ How to demonstrate compliance?
- ▶ What is the scope of "all rules and regulations"?
- ► Striking a good balance between practicality to comply vs. tax incentive abuse?

Compliance and tracking

- ► Lack of guidelines / guidance in relation to compliance with tax incentive conditions and the relevant tracking steps to be taken
- ► Taxpayer is uncertain as to what exactly should be carried out to demonstrate compliance

Tax incentive legislation

Gazette orders

- ► There are various tax incentives which have not been gazetted (e.g. ECER tax incentives)
- ► What should be the correct sources for taxpayers to refer to for tax incentives available?

Thank you
